01 PRODUCT OVERVIEW

The POCKET series features advanced thermal imaging technology and high-sensitivity infrared detectors for exceptional outdoor night vision capabilities. With the ability to perform in all weather conditions, from sun to rain, the POCKET series is perfect for night hunting and observation. Plus, it offers a range of functions including photography, video recording, and more.

02 PRODUCT FEATURES

Sensor resolution:K2: 256x192, K3: 384x288	Sensor NETD:<25mK
Sensor frame rate:50Hz	Display screen: OLED 800x600
18650 replaceable battery	Light weight
Small, compact and can be placed in a pocket	Ergonomics design, comfortable to use

03 PRODUCT PARAMETERS

POCKET SERIES	K3	K2
Sensor		
Type	VOx Uncooled	
Resolution, pixels	384x288	256x192
Pixel pitch, μm	12	
NETD, mK	<25	
Frame Rate, Hz	50	
Optics		
Objective Lens, mm	15mm; F1.0	9mm; F1.0
Optic Zoom, x	2	1.7
Field of View (H), degrees / yd @ 100 yd	17.5°/33.6yd	19.4°/37.3yd
Digital Zoom, x	1x/2x/4x	
Eye Relief, mm	13.5	
Diopter Adjustment, D	-7 to +2	
Range Performance		
Detection Range, m/yd	780m/853yd	468m/512yd
Display		
Type	OLED	
Resolution, pixels	800x600	
Video Recorder		
Video / Photo Resolution, pixels	800x600	
Video / Photo Format	.mp4 / .jpg	
Built-in Memory, GB	8	

POCKET SERIES		K3	K2
Wi-Fi			
Wireless Protocol	Wi-Fi		
Frequency, GHz	2.4GHz		
Environmental Characteristics			
Degree of Protection, IP code	IP67		
Operating Temperature Range, °F	-4 to +122		
Battery Type	18650		
Capacity, mAh	3200		
Operating Time on Battery Pack (at t=72°F), h	About 6		
External Power Supply	5V (Type-C USB)		
Weight & Size			
Dimensions, inch	4.9×1.8×2.9		
Weight, lb	about 0.47 (without battery)	about 0.44 (without battery)

05 PRODUCT APPEARANCE

06 POWER SUPPLY

The POCKET series is only powered by a replaceable 18650 battery with a length of 65mm.

- ▶ To open the battery compartment lid, push down on the latch.
- ▶ Install the battery into the compartment, positive (+) pole inward and negative (-) pole outward, as indicated by the symbols inside the battery compartment.
- ▶ After inserting the battery, press and push up on the latch to secure the battery cover.

Warning

- ▶ Please remove the battery if the device is not in use for a long time.
- ▶ Do NOT power the device with a modified or damaged battery.
- ▶ Please Note: The decrease in battery pack capacity under sub-zero temperatures is a normal occurrence and not a factory defect.
- ▶ Do not use the battery at a temperature above 50°C, as it may reduce the service life of the battery.

07 BUTTONS OPERATION

Button	Current Status	Short Press	Long Press
Power	Powered off	—	Power on the device
	Stand by	Wake up the device	
	Home screen	Standby	Power off the device
	Menu screen	Return to the home menu with saving changes	—
Zoom	Home screen	Adjust the magnification	Manual Image Correction
	Menu screen	Flip up	—
Menu	Home screen	—	—
	Menu screen	Adjust the parameters of a function	—
Video	Home screen	Start / Stop video recording	Take a photo
	Menu screen	Flip down	—

08 POWER ON/OFF

Power On / Starting

1. Open the objective lens cap. Press and hold the lens cap and push it downward.
2. Long press the Power button for 3 seconds to turn on the device. The RIX logo will appear.

Powering Off / Stopping

Long press the Power button for 3 seconds to turn off the device.

Note

Releasing the Power button at any time during this shutdown cycle will stop the shutdown process.

Warning

If using an external power supply, do not disconnect the power supply when saving data, otherwise the data may not be saved.

09 STATUS BAR

The status bar is located at the bottom of the screen and displays the operating status information of the device. From left to right:

1. Image mode: White Hot (default), Black Hot, Red Hot, Color.
2. Digital zoom: 1×(default), 2×, 4×.
3. Weather mode: Sun, Rain.
4. Auto image correction mode: On/Off.
5. Wi-Fi connection: On/Off.
6. Clock
7. Battery Level

10 SHORTCUT FUNCTION

The shortcut functions can be directly used through buttons on the home screen.

Digital Zoom (Zoom Button)

On the home screen, simply press the Zoom button to zoom in and out on the subject.

The status bar provides a real-time display of the magnification level as you adjust it.

Manual Image Correction (Zoom Button)

This function is effective for enhancing degraded or uneven images. By balancing the background temperature of the detector, calibration can eliminate image defects and improve overall quality.

If you feel that the image is bad, you can press and hold the Zoom button until hearing a clicking sound.

Standby (Power Button)

If you are not currently using the device, but do not want to shut it down, you can use standby mode. This function can reduce device power consumption and extend battery life.

Briefly press the Power button to enter standby mode, then press the Power button again to exit standby mode.

Image Mode (Menu Button)

White Hot (default)

Black Hot

Red Hot

Color

Highlight

Briefly press the Menu button to switch the image mode including white hot (default), black hot, red hot, color, highlight (only for K3).

Note: When using highlight mode, the heat source target in the image is more prominent and brighter, and the background is darker, making it easier to quickly identify the target.

Photo/Video (Video Button)

► Video Recording

Short press the Video button to start recording. A prompt box showing the recording time will appear in the upper right corner of the screen with a time format of HH:MM:SS (hour:minute:second). Short press the Video button again to stop and save the video recording.

► Photo Taking

Long press the Video button to take a photo, and the screen will freeze with a photo icon flashing in the upper left corner.

Note

- The photos and videos taken will be saved on the built-in memory card respectively in the format of PIC_HHmms.jpg (photos) and VIDEO_HHmms.mp4 (videos). It is recommended to synchronize the device time and date through the app before using the photo/video mode. You can find specific operation instructions in the RIX App which is available to download on our

website, www.rixoptics.com.

- ▶ The maximum duration of a video recording file is 10 minutes. When the duration is more than 10 minutes, the video will be automatically recorded onto a new file.
- ▶ To download photos and videos, turn on the device to run, and connect it to a computer with the data cable. On your computer, Double-click MY COMPUTER on the Desktop Screen, find the device named "POCKET", and double-click to open the device named "POCKET_KX" to access the captured media.
- ▶ You can easily optimize the storage space by either deleting or moving the media files to a storage device.

To avoid damaged video footage, please turn off the device properly.

MAIN MENU

On the home screen, press and hold the Menu button to open the menu screen. Choose functions by the Zoom and Video button, setting by the Menu button.

Screen Brightness

Press the Menu button to set the screen brightness with a range of 1-5, with 3 being the default.

Image Contrast

Press the Menu button to set the image contrast with a range of

1-5, with 3 being the default.

Weather mode

Press the menu button to set the weather mode, choosing sun or rain.

Auto Image Correction

Press the menu button to set the auto image correction on or off.

When the function is on, the device will automatically correct the image according to the software algorithm. When the function is off, on the home screen, you can press the Zoom button to correct it manually.

Note

No matter the function is on or off, the manual image correction function can be used on the home screen.

Wi-Fi

The device has a built-in Wi-Fi module and can connect to an external device (computer or smartphone) via Wi-Fi.

1. Press the menu button to choose on/off.
2. Search for the Wi-Fi named "POCKET_KX_XXXXXX" on a phone or computer.
3. Select the Wi-Fi and enter the password to connect. The initial password is 12345678.

After a successful connection to Wi-Fi, the device can be controlled via the mobile app.

Note

- ▶ The function does not show up on the device.
- ▶ The function does not work at 1x digital zoom and only automatically works at 2x and 4x digital zoom.
- ▶ The function is available on all POCKET series products.

13 APP DESCRIPTION

The device comes with a dedicated app. By connecting the device to the app on a cell phone, tablet, or laptop you can enjoy real-time image transmission, perform device operations, and receive program updates. Download instructions for using the app from the official website, www.rixoptics.com.

Linktree

RIX+ Android

RIX+ IOS

Users have the option to update the firmware of the device by utilizing the app or downloading the latest version from www.rixoptics.com.

►About App

You can download and install the app on the official website (www.rixoptics.com) or by searching RIX+ in an app store.

▼14 PRODUCT MAINTENANCE

Prior to using the device, it is important to conduct a thorough technical inspection to ensure the following items are in proper working condition.

To remove dust and dirt from the metal and plastic parts, use a cotton cloth and gently wipe the surface clean.

Make sure that the 18650 battery being used is free from any bulges or deformations and that the plastic cover is not damaged.

▼15 PRODUCT TROUBLESHOOTING

Refer to the table below, which outlines potential issues that may arise during operation. For product issues that can not be remedied or are not listed below, please contact RIX Optics customer support by visiting www.rixoptics.com.

Fault	Possible Causes	Solutions
The device cannot be started.	The battery is out of charge.	Charging
The device cannot be powered by an external power supply	The USB cable is damaged.	Replace the USB cable.
	The external power supply is insufficient.	If necessary, check the external power supply.
The image is too dark.	The screen is not bright enough.	Adjust the display brightness
The image quality is poor or the detection range shortens.	These problems are likely to occur when you use the device in harsh weather (such as sun, snow, rain, and fog).	
The device cannot connect to a mobile phone or computer.	The Wi-Fi password is incorrect.	Enter the correct password or reset the device back to factory setting.
	There are too many Wi-Fi networks in the range of the device, which may cause interference.	For a stable network connection, it is recommended to relocate the device to an area with a lower number of Wi-Fi networks.
Wi-Fi signals are lost or interrupted.	The device is beyond Wi-Fi coverage. There is blocking (such as concrete walls) between the device and the receiver.	Move the device to a place where you can receive Wi-Fi signals.
When the device is used at a low temperature, the imaging quality is poorer than that at a normal temperature.	At temperatures above 0°C, the temperature rise varies with the observed objects (environment and background) due to different heat conductivity coefficients. As a result, high-temperature contrast occurs, and the image quality is better. At low temperatures, the observed targets (background) usually cool down to a similar temperature because of reduced temperature contrast. Therefore, the image quality (details in particular) is poor, which is a characteristic of thermal imaging devices.	

Wireless Transmitter Module Frequency Range

WLAN: 2.412-2.472GHz

Wireless transmitter module power < 20dBm

FCC Statement

FCC-ID: 2A7ZZ-3A-03

Labeling Requirements

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Information To The User

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

EMC Class A

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

To comply with RF exposure requirements, a minimum separation distance of 0.00 cm must be maintained between the user's body and the handset, including the antenna.

The logo for Rix, featuring the letters 'R', 'I', and 'X' in a stylized, white, sans-serif font. The 'R' and 'I' are connected, and the 'X' is separate. The background is split diagonally from the top-left to the bottom-right, with a dark grey/black area on the left and a bright orange area on the right.
